

Keeping track of calculators is always a headache. With our class packs it's easy to see if one is missing without having to count. We have developed foam inserts for a wide range of calculators but would be happy to create bespoke new ones for your range. As one teacher told us 'If it's stored, it stays!' which is particularly important for calculators.

Don't forget our trays have passed rigorous educational standards and have been awarded an important award for their design by Worlddidac, the international trade educational supplies trade body, ([www.worlddidac.org](http://www.worlddidac.org)).

Why not browse through a wide selection of sets that have used Gratnells trays over the past ten years?
